POSITIONS OF BIRTH

Introduction:

It is categorically clear that some people are born with the same mothers and the same fathers. It is the easiest way of identifying their positions of births. Thus First Born, Second Born and so on. However others have the same fathers but different mothers and vice versa.

Here it is very difficult to categorize their positions of birth. Thus the person is the first born from his father side, whiles he/she is third from mother side. Is he/she going to be first or third born? From the Quranic point of view, it gives much strength to the father than the mother so in controversial issue such as the above, if you are a Muslim, choose the position of birth from your father's side.

Beside if you are a non-muslim, you can inter-relate them and come out with a result. For example if you are first born from your mother and fourth born from your father then you can deduce from first and fourth born to come out with your result or if your tradition gives much strength to your mother than your father then you can take that side.

Eg: like the Akans tradition in Ghana, they belong to the mother's side. As for people who die they are not related to these issues.
